Attn: Susan Kennedy

Dear Susan:

Enclosed is the full, final data package for Richardson Flats Tailings. These results supersede all data in the partial release sent to you previously.

Included in this package are: total metals, dissolved metals, cyanide and sulfate for four ground water stations; total metals and percent solids for six soil stations. All values previously reported in the partial release remain unchanged in this submission. This package includes total metals data for six soil stations not previously reported in the partial release. If I can be of further assistance, please call me.

Sincerely,

*Joan K. Barnes*
